

Windows Wi-Fi Alternative Setup

1. Click the Wi-Fi icon at the bottom right of your screen.

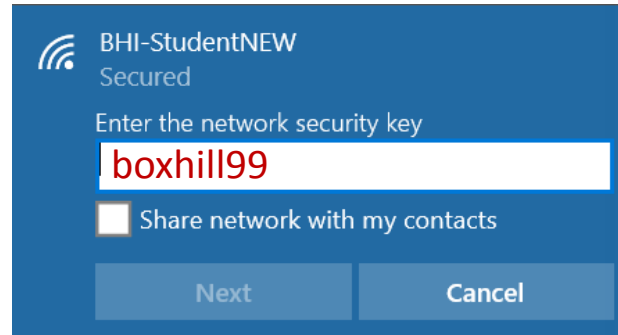

2. Select the **BHI-StudentNEW** network.

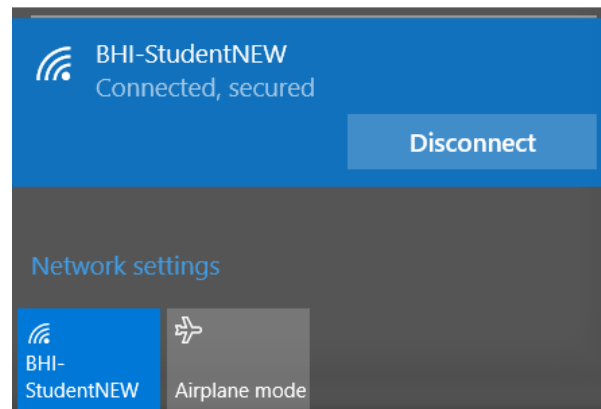

3. Click **Connect** when this pops up.

4. At this point you will be prompted for a network security key. Please type in the following password: **boxhill99**

5. Click **Next** and the connection will establish.

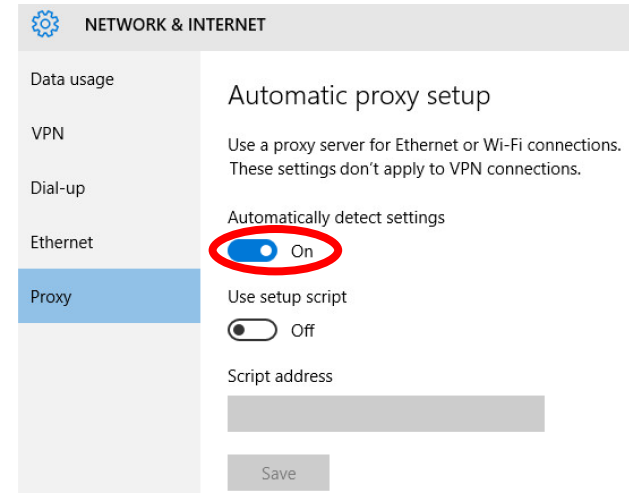

6. **BHI-StudentNEW** will now show as connected.

Your wi-fi connection is now configured. If you are still unable to browse the public internet, you may need to configure the Box Hill proxy server in your browser.

1. In the search pane bottom left corner type “**change proxy settings**” and press enter

2. Ensure **Automatically detect settings** is switched on
