

The welfare, behaviour, and exercising dogs Cluster

ACMGEN303 - Assess the welfare status of an animal

ACMBEH301 - Identify behaviours and interact safely with animals

ACMGEN308 - Walk and exercise dogs

Session #1

All referencing for copyright purposes is located within the Notes section of this resource.

This resources covers the following performance criteria:

ACMGEN303: None

ACMBEH301: 1.2, 2.1, 2.2

ACMGEN308: 1.4, 2.2

Engagement Activity

- What do you already know about identifying dogs?

What is a dog?

Physical Features

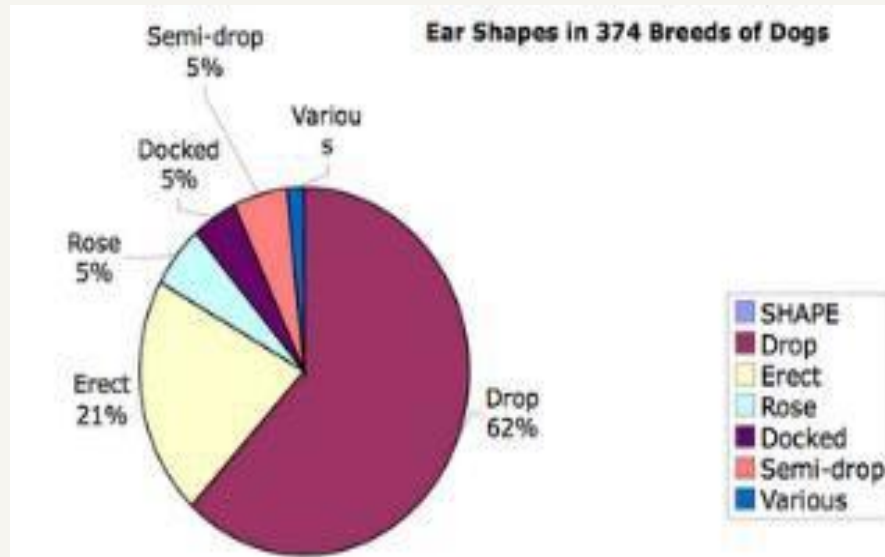

Head

Skull/Snout Shapes			
			
Doliocephalic (long-nosed)	Mesocephalic	Brachycephalic	Extreme Brachycephalic (short-nosed)

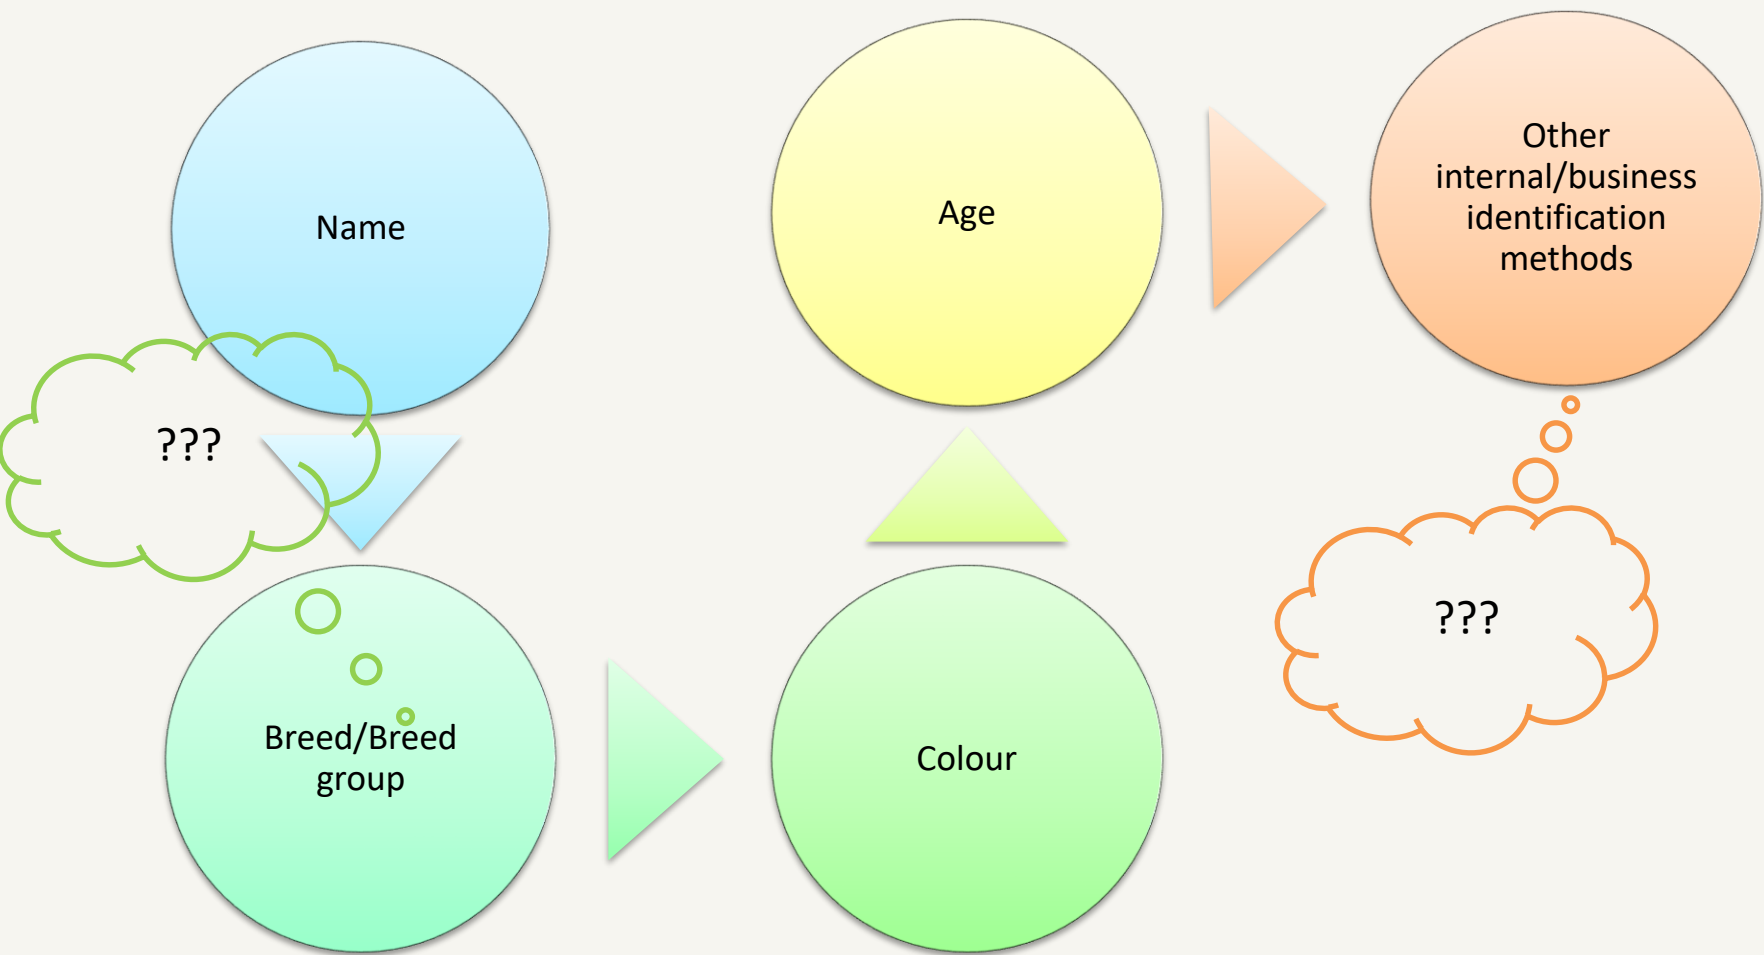

Ears

How else are dogs distinguished from
each other?

Identification of dogs in a shelter/kennel

- What should we want to know?

Overall Rank 2021	Breed	Type / Classification	2020	2021	YoY%	YoY Ranking Change +/-
1	Golden Retriever	Sporting / Gundog Group	1,094,000	1,722,000	57%	1
2	Border Collie	Herding Group	928,500	1,519,500	64%	2

20	Chihuahua	Toy Group	538,200	832,000	55%	0
21	Samoyed	Utility Group	545600	790,200	45%	1
22	Chusky	Miscellaneous Group	521400	779,200	49%	2
23	Bernese Mountain Dog	Utility Group	477,600	777,200	63%	-3
24	Tibetan Mastiff	Utility Group	443,000	704,000	59%	1
25	Poodle	Non-Sporting Group	422,200	695,200	65%	-1

History of dogs

- Though we often don't think about them in this way, the history of individual dog breeds is really about people!
- Figures who developed particular breeds for particular tasks
- Some breeds —like the Doberman Pinscher—owe their existence to just one visionary person.
- Other breeds were brought into being by specific cultures or classes of people.

Coats that evolved to survive the local climate

Body styles developed to navigate native terrains

Characters that fit into the social mores of the day

What are some of these breeds best known for (ie behaviours/job roles/temperaments)?

- Ie:
 - [Golden Retrievers](#) = friendly, gentle mouths to retrieve shot fowl/bird during hunt
 - [Border Collie](#) = highly intelligent, energy+++++++, herding
 - ???

Breed group

- [ANKC](#) or [Dogs Victoria](#) both have great databases of info
 - [Toy](#)
 - [Terrier](#)
 - [Gundog](#)
 - [Hound](#)
 - [Working Dogs](#)
 - [Utility](#)
 - [Non Sporting](#)

Toy Group

- The diminutive breeds of the Toy Group come in enough coat types and colors to satisfy nearly any preference, but all are small enough to fit comfortably in the lap of their adored humans.
- In a way, toy dogs are their own version of working dogs: they work hard at being attentive, affectionate companions.

Terrier Group

- First bred to go underground in pursuit of rodents and other vermin.
 - Long-legged terrier breeds: dig out vermin
 - Short-legged terrier breeds: burrow in after them

Gundog Group

- Though we often don't think about them in this way, the history of individual dog breeds is really about people!
- –Figures who developed particular breeds for particular tasks
- –Some breeds —like the Doberman Pinscher— owe their existence to just one visionary person.
- –Other breeds were brought into being by specific cultures or classes of people.

Byrd Dog Photography

Hound Group

- Bred to pursue warm-blooded quarry
- –Sleek, long-legged **sighthounds** use explosive speed and wide vision to chase swift prey, like jackrabbits and antelope
- –Tough, durable **scenthounds** rely on powerful noses to trail anything from raccoons to escaped convicts.
- –Members of the Hound Group possess strong prey drives.

(Sight or Scent)Hound?

(Sight or Scent)Hound?

Scenthound

Possesses a
precaudal gland that
typically most
sighthounds don't
have

Thick African bush
requires scentwork
to locate quarry not
sight

Sighthound

Stamina through
developed lung
capacity

Agility and speed by
the boatload

Utility Group

- Dogkind's punch-the-clock, blue-collar workers, and the group includes some of the world's most ancient breeds.
- •They were developed to assist humans in some capacity –including pulling sleds and carts, guarding flocks and homes, and protecting their families –and many of these breeds are still used as working dogs today.
- •Breeds in the Working Group tend to be known for imposing stature, strength, and intelligence.

The Boxer

- Ancestors can be traced back to 2500 BC with Assyrian war dogs
- One of the first police dogs. They've done many jobs in society over the years.
 - For instance, they've been war dogs, guard dog, herding dogs, police dog, watchdogs, board/bison hunting dogs and fighting dogs.

The Rottweiler

- Developed to be herding dogs initially
- Then tasked to be a butcher's aide:
 - No thieves dared to steal meat from the cart pulled by this breed from town to town
 - Pouches of money collected at the market hung around their necks.
 - When the market closed, Rottweilers accompanied their butchers on the way to the bank to make sure no one attempted to rob them.

Working Group

- Breeds developed for moving livestock, including sheep, cattle, and even reindeer.
- Working dogs work closely with their human shepherds, and their natural intelligence and responsiveness makes them highly trainable.
- Today, some Working breeds, such as the German Shepherd Dog, are commonly trained for police work.
- The high levels of energy found in Working Group breeds means finding them a job is recommended, to occupy the mind before they begin herding small children at home!
- Herding behaviours are very strong in this group. The Collie Walk is a fun behavior to see at the park! 😊

 - [Article: Australia Deploys Sheepdogs to Save a Penguin Colony - The New York Times \(nytimes.com\)](#)

Non-sporting Group

- The breeds of the Non-Sporting Group have two things in common: wet noses and four legs. After that, there's not much shared by this patchwork group of breeds whose job descriptions defy categorization in the six other groups, though they all have fascinating histories.
- Today, the varied breeds of the Non-Sporting Group are largely sought after as companion animals, as they were all developed to interact with people in some capacity.

Activity:

- In pairs, pick a dog from the Non-sporting Group list
- Research the history of your breed
- Write on the board/in the chat what you have found (job history? Origin info? Breed crossings? Fun facts?)
- You have 15 minutes 😊

A C T I V I T Y

So what about hybrid vigor?

- noun: **hybrid vigor**
- the tendency of a cross-bred individual to show qualities superior to those of both parents.
